

马均昊

求职意向：产品经理

电话&微信：(+86) 187-0971-9211 邮箱: ma.junhao@outlook.com

教育背景

中国传媒大学 本科

2024.09 -- 2028.06

广告与品牌学院 数据科学与智能媒体学院

广告学（计算广告双学士学位复合型人才培养项目）

- 培养特色：广告营销与数据科学交叉培养，兼具广告业务理解、产品思维与数据分析、AI 应用能力。

科研与竞赛

- IAMCR 论文（三作）：研究受众对情感视觉内容的信息加工机制，探索脑电数据在广告素材效果评估中的应用。负责对脑电数据的分析清洗工作，产出实证结论。
- 正大杯市场调研大赛 省一等奖：主导华北地区瑕疵果电商消费行为研究，基于 565 份问卷与 533 条电商评论数据，运用 SEM、多分类 Logistic 回归、K-Means 聚类、NLP 文本挖掘及深访等方法，构建消费者购买意愿驱动模型，提出 PRISM 运营策略框架。

实习经历

蓝色光标

AI产品实习生（数字员工落地与运营）

2026.08-2026.09

数据平台组为面向全公司业务组的技术中台，我负责了汽车事业群脚本承接达人投放场景的审核 Agent 的架构设计能力建设与落地。

- 架构设计与落地：梳理业务流程并规范审核逻辑，将确定性步骤规则化、判断推理环节交由模型处理；基于 OpenClaw 设计“主 Agent 解析文档、子 Agent 分系列审核”的层级架构，通过工具裁剪、边界约束与 Prompt 精简降低上下文占用与执行发散；建立新系列标准化接入流程，支持审核能力向全汽车事业群复用，并规划后续向 A2A 协作模式演进。
- 自进化知识库搭建：参考 LLM-Wiki 思路设计并落地审核知识库，将审核规则、品牌与产品规范由 Agent 自行维护，建立业务反馈闭环，支持规则迭代与新客户快速接入。
- 落地迭代与问题攻坚：持续迭代审核规则与产品能力（扩展支持的文件格式等），针对 Agent Loop 长会话下上下文膨胀导致的执行稳定性问题进行优化，推动 Agent 架构从设计方案落地至实际可用。
- Skill 治理体系搭建：统一集团内部 Skill 鉴权方式，主导鉴权改造与运营看板汇报机制建设，实现 Skill 运行结果可监控、可归因，建立后续 Skill 统一治理基础。

百度

产品经理实习生（广告中台&智能体）

2026.01 -2026.06

素材中台服务内部策略、投放团队与外部代理商，承接百度自有产品效果投放“素材生产供给—资产治理—多渠道分发投放”全链路能力。我主要负责 AI 能力建设与媒体投放接入，推动素材能力从平台化向智能化演进。

- AI Agent 产品化：围绕广告素材“生产—管理—分析—分发—投放”全链路，规划建设 AI 智能搜索、AI 智能分析、AI 智能分发能力，在网赚、搜索、短剧三个场景落地，打通“分析找方向—派单出素材”闭环；初期上线后月均分析派单素材约 2.3 万条，占素材生产量 15%。
- MAPI 接入与投放能力补强：完成华为、小米、快手等头部媒体 MAPI 对接升级，覆盖创编字段优化、广告版位扩展、API 版本迭代及原生广告能力落地；夯实平台投放底层基建，提升内部媒体能力落地覆盖率，将产品迭代周期缩短30%。
- 中台标签体系治理：基于业务优化需求与平台长期规划，结合素材管理与代理商管理场景重新设计平台分产品线与素材场景标签方案，提升素材生产、上传、管理、投放及数据回收链路稳定性，为 AI 检索与效果分析提供结构化数据基础。
- 素材智能体产出效果优化：通过 Prompt 工程优化前贴场景 AIGC 素材生产流程，并沉淀为 Skill，实现热点洞察、创意探索与素材优化的自动化。

SocialBeta

内容运营实习生

2025.06 -2025.12

追踪行业动态、拆解优秀营销案例，主导视频内容策划与产出，实现视频号点赞环比增长 150%，积累营销内容洞察与行业分析能力。

专业技能

- 广告营销：具备广告营销业务理解，熟悉计算广告业态、互联网广告业务链路及 DSP / DMP / ADX 等机制。
- AI Agent：具备 AI Agent 的应用与落地能力，掌握 AI 产品设计、评估与迭代方法论，熟悉 Prompt、Skill、MCP 等概念，持续关注追踪 AI 前沿动态。
- 产品设计：具备产品思维与业务思维，掌握需求分析、PRD 撰写、业务流程梳理、竞品分析、方案设计，具备产品落地推进能力。
- 数据分析：具备数据分析能力，掌握 SQL、Python 与 BI 工具等，能够通过数据支持业务决策。

Junhao Ma (马均昊)

Seeking: Product Manager

Education

Communication University of ChinaSept. 2024 – June 2028

School of Advertising and Brands & School of Data Science and Intelligent MediaMajor: double bachelor degree in computational advertising)

- Program Focus:** Interdisciplinary education bridging advertising marketing and data science; equipped with advertising business acumen, product mindset, data analytics, and AI application capabilities.

Professional Skills

- Advertising & Marketing:** In-depth understanding of advertising and marketing business; familiar with the computational advertising ecosystem, digital advertising lifecycles, and underlying mechanisms of DSP, DMP, ADX, etc.
- AI Agent:** Capable of AI Agent design and practical deployment; proficient in AI product design, evaluation, and iteration methodologies; familiar with Prompts, Skills, MCP (Model Context Protocol), etc.; actively tracking frontier AI advancements.
- Product Design:** Strong product thinking and business abstraction capabilities; proficient in requirements analysis, PRD writing, business process optimization, competitive analysis, and solution architecture design, with solid execution skills to drive product delivery.
- Data Analysis:** Proficient in data analysis using SQL, Python, and BI tools; capable of driving business decisions through data insights.

Internship Experience

BlueFocus (蓝色光标)AI Product Intern (Digital Employee Implementation & Operation)July. 2026 – Sept. 2026

The Data Platform Group serves as a company-wide shared technology platform team. I led the architectural design, capability building, and delivery of a script review Agent for the Automotive Business Group's influencer marketing scenarios.

- Architectural Design & Implementation:** Standardized business workflows and review logic by formulating deterministic steps into rules and delegating reasoning/judgment to LLMs. Architected a hierarchical framework on OpenClaw featuring a "Main Agent for document parsing and Sub-Agents for series-specific reviews." Reduced context window consumption and execution divergence via tool pruning, boundary constraints, and prompt minimization. Established a standardized onboarding pipeline for new vehicle series to scale across the Automotive Business Group, laying out a roadmap toward an Agent-to-Agent (A2A) collaboration model.
- Self-Evolving Knowledge Base:** Designed and deployed a review knowledge base inspired by LLM-Wiki, enabling the Agent to autonomously maintain review rules, brand guidelines, and product specs. Established a closed feedback loop to facilitate rapid rule iterations and new client onboarding.
- Iterative Optimization & Problem Solving:** Continuously refined review rules and product features (e.g., expanding supported file formats). Resolved system instability caused by context window expansion in long-running Agent loops, driving the Agent architecture from design blueprint to stable production.
- Skill Governance Framework:** Standardized internal enterprise Skill authentication protocols; led the authentication refactoring and operational dashboard reporting mechanism, making Skill execution monitorable, attributable, and traceable.

Baidu (百度)Product Manager Intern (Ad Platform & Intelligent Agents)Jan. 2026 – June 2026

The shared creative platform serves internal strategy teams and external agencies, supporting the end-to-end lifecycle of "creative production & supply — asset governance — multi-channel distribution & placement" for Baidu's proprietary performance advertising. Focused on AI capability development and media API integrations to transform creative workflows from platform-based to AI-driven.

- AI Agent Productization:** Planned and built AI Smart Search, AI Smart Analysis, and AI Smart Distribution across the creative lifecycle (production, management, analysis, distribution, and ad placement). Deployed solutions across cash-reward apps (incentive-based apps), search, and short-drama verticals, establishing a closed loop of "insight-driven direction to task-dispatch production." Analyzed and dispatched ~23,000 creatives per month post-launch, accounting for 15% of total creative production.
- MAPI Integration & Delivery Capability Enhancement:** Completed MAPI upgrades and integration for top media platforms including Huawei, Xiaomi, and Kuaishou, covering ad-creation field optimizations, placement expansion, API version upgrades, and native ad capabilities. Solidified underlying delivery infrastructure, increased media capability coverage, and shortened product iteration cycles by 30%.
- Platform Tagging System Governance:** Redesigned the platform's product-line and creative-scenario taxonomy based on business optimization needs and long-term platform strategy. Enhanced data pipeline stability across production, asset upload, management, placement, and attribution, providing structured data foundations for AI retrieval and performance analysis.
- Creative Agent Output Optimization:** Optimized the AIGC pre-roll video ad production workflow via Prompt Engineering and packaged it into reusable Skills, automating trending topic insights, creative ideation, and asset optimization.

SocialBetaContent Operations InternJune 2025 – Dec. 2025

- Tracked industry dynamics, analyzed benchmark marketing campaigns, and led video content planning and production.
- Drove a 150% MoM increase in WeChat Channels likes, gaining solid marketing content insights and industry analysis skills.

Research & Competitions

- IAMCR Academic Paper (3rd Author):** Researched audience information processing mechanisms regarding affective visual content and explored the application of EEG (electroencephalogram) data in ad creative effectiveness evaluation. Responsible for EEG data cleaning and quantitative analysis to derive empirical conclusions.
- Zhengda Cup National Market Research Competition (Provincial First Prize):** Led a market research project on e-commerce consumer behavior regarding cosmetically imperfect fruits in North China. Based on 565 questionnaires and 533 e-commerce review entries, integrated SEM (Structural Equation Modeling), multinomial logistic regression, K-Means clustering, NLP text mining, and in-depth interviews to build a purchase-intent driver model, proposing the PRISM operational strategy framework.
